 EC-HQ – Executive Committee-Headquarters  
 BAR-CP – Barley Coordinated Project  
 DUR-CP – Durum Coordinated Project  
 HWW-CP – Hard Winter Wheat Coordinated Project  
 VDHR – Variety Development & Uniform Nurseries – Sub categories are below:  
 SPR – Spring Wheat Region  
 NWW – Northern Soft Winter Wheat Region  
 SWW – Southern Soft Red Winter Wheat Region

**Project 1:** *New sources of Resistance to FHB and DON in Wheat.*

**1. What are the major goals and objectives of the project?**

There are only a few sources of resistance to FHB available for wheat improvement. The proposed research is aimed at identifying new sources of FHB resistance in wild relatives of wheat and using directed chromosome engineering to produce agronomically useful compensating wheat-alien translocations, which are then being transferred into adapted wheat cultivars. We have previously identified novel sources of FHB resistance derived from *Leymus racemosus*, *Fhb3*, and *Elymus tsukushiensis*. In addition, we are continuing to evaluate wheat-alien introgression lines for the presence of novel sources of FHB resistance.

**2. What was accomplished under these goals?**

We are presently transferring *Fhb6* present on the wheat-*E. tsukushiensis* translocation chromosome T1AL1AS-1E<sup>ts</sup>#1S into the moderate resistant hard red winter wheat cultivars Everest, Lyman, and Overland. The germplasm release KS14WGRC61 with *Fhb6* was crossed twice with Everest, Lyman, and Overland. We are presently using molecular marker analysis to identify plants that are heterozygous for T1AL1AS-1E<sup>ts</sup>#1S and are using Genotyping-By Sequencing to recover plants with the recurrent wheat background. These plants will be selfed and plants homozygous for *Fhb6* will be selected and evaluated for their FHB resistance and DON accumulation under greenhouse and field conditions.

**3. What opportunities for training and professional development has the project provided?**

Nothing to Report

**4. How have the results been disseminated to communities of interest?**

The results were presented at the National Fusarium Head Blight Forum and were published in peer-reviewed international scientific journals. The germplasms with novel sources of FHB resistance were distributed to public and private wheat breeding programs.

### **Training of Next Generation Scientists**

**Instructions:** Please answer the following questions as it pertains to the FY15 award period. The term “support” below includes any level of benefit to the student, ranging from full stipend plus tuition to the situation where the student’s stipend was paid from other funds, but who learned how to rate scab in a misted nursery paid for by the USWBSI, and anything in between.

- 1. Did any graduate students in your research program supported by funding from your USWBSI grant earn their MS degree during the FY15 award period?**

No

- 2. Did any graduate students in your research program supported by funding from your USWBSI grant earn their Ph.D. degree during the FY15 award period?**

No

- 3. Have any post docs who worked for you during the FY15 award period and were supported by funding from your USWBSI grant taken faculty positions with universities?**

No

- 4. Have any post docs who worked for you during the FY15 award period and were supported by funding from your USWBSI grant gone on to take positions with private ag-related companies or federal agencies?**

No

**Release of Germplasm/Cultivars**

**Instructions:** In the table below, list all germplasm and/or cultivars released with full or partial support through the USWBSI during the FY15 award period. All columns must be completed for each listed germplasm/cultivar. Use the key below the table for Grain Class abbreviations. *Leave blank if you have nothing to report or if your grant did NOT include any VDHR-related projects.*

Name of Germplasm/Cultivar	Grain Class	FHB Resistance (S, MS, MR, R, where R represents your most resistant check)	FHB Rating (0-9)	Year Released

Add rows if needed.

**NOTE:** List the associated release notice or publication under the appropriate sub-section in the ‘Publications’ section of the FPR.

**Abbreviations for Grain Classes**

- Barley - BAR
- Durum - DUR
- Hard Red Winter - HRW
- Hard White Winter - HWW
- Hard Red Spring - HRS
- Soft Red Winter - SRW
- Soft White Winter - SWW

## **Publications, Conference Papers, and Presentations**

Refer to the FY15-FPR\_Instructions for listing publications/presentations about your work that resulted from all of the projects included in the FY15 grant. If you did not have any publications or presentations, state 'Nothing to Report' directly above the Journal publications section.

### **Journal publications.**
