Project 1: US Wheat & Barley Scab Initiative's Networking & Facilitation Office and Website.

1. What are the major goals and objectives of the project?

The main goal of this project is the operation of the headquarters (Networking & Facilitation Office (NFO)) for the U.S. Wheat & Barley Scab Initiative by hosting the NFO's Administrator.

This project is directly associated with the following two FY16 Projects:

Project Title – Project ID	Principal Investigator	ARS ID/Institution
U.S. Wheat & Barley Scab Initiative's Networking and Facilitation Office, and Website.- FY16-VA-001	Blechl, Ann	NA/USDA-ARS
U.S. Wheat & Barley Scab Initiative's Networking and Facilitation Office, and Website.- FY16-VA-001	Van Sanford	59-0206-6-001/ University of Kentucky

2. What was accomplished under these goals? *Address items 1-4) below for each goal or objective.*

1) major activities

- Hosted the 2016 National Fusarium Head Blight Forum: the NFO working with the Forum Organizing Committee facilitated the USWBSI's annual scientific Forum, which was held in St. Louis, Missouri. Around 190 scientists (including research associates, research technicians and graduate students), growers, and industry representatives from across the nation and around the world, as well as area leaders of the U.S. wheat and barley industry, attended the 2016 National FHB Forum. Research results and findings were presented to the forum participants in the form of invited talks (15), and poster (53) presentations accompanied by abstracts or papers published in the Forum proceedings. One morning was devoted to group discussions designed around the USWBSI's five research areas and three commodity-based coordinated projects. The annual Forum is the primary mechanism whereby USWBSI scientists and stakeholders come together to discuss both the progress being made, as well as problems that interfere, with the successful combat against this devastating disease.
- Development of the USWBSI's FY17 Research Plan and Budget, which was not approved by USDA-ARS until May, 2017: One-hundred and twenty-five (125) research projects across five (5) research areas (FHB Management, Food Safety & Toxicology, Gene Discovery and Engineering Resistance, and Variety Development and Host Resistance (primarily organized around three regional FHB nurseries)), three commodity-based coordinated projects (Barley, Durum, and Hard Winter Wheat), and the USWBSI Headquarters (Office and Website),

were recommended for funding in the amount of \$5,030,830 to continue the fight against FHB.

- 2) specific objectives
 - i. Maintain and enhance the Resource Management/Accountability Center;
 - ii. Facilitate and enhance communication within the Initiative and with its stakeholders;
 - iii. Administer the process of developing the Initiative’s annual recommended research plan and budget; and
 - iv. Manage and implement all meetings and conferences.

- 3) significant results
