\* MGMT – FHB Management  
FST – Food Safety & Toxicology  
R- Research  
S – Service (DON Testing Labs)  
GDER – Gene Discovery & Engineering Resistance  
PBG – Pathogen Biology & Genetics  
EC-HQ – Executive Committee-Headquarters  
BAR-CP – Barley Coordinated Project  
DUR-CP – Durum Coordinated Project  
HWW-CP – Hard Winter Wheat Coordinated Project  
VDHR – Variety Development & Uniform Nurseries – Sub categories are below:  
SPR – Spring Wheat Region  
NWW – Northern Soft Winter Wheat Region  
SWW – Southern Soft Red Winter Wheat Region

**Project 1:** *Genomics-Assisted Recurrent Selection to Enhance FHB Resistance in Durum Wheat*

**1. What are the major goals and objectives of the research project?**

- (1) Improve FHB resistance of a durum wheat population through recurrent selection
- (2) Explore genomics-assisted selection to enhance the efficiency of recurrent selection
- (3) Develop new durum wheat inbred lines with improved FHB resistance through introgression of resistance genes from hard red spring wheat

**2. What was accomplished under these goals or objectives? (For each major goal/objective, address these three items below.)**

**a) What were the major activities?**

*Towards Objective 1*

A total of 150 S1 families of a C2 population were evaluated for FHB severity at two locations, Fargo and Prosper in 2021. Top 15 families will be selected. The 150 S1 families were also evaluated in greenhouse. Top 2 plants from each of the top 15 selected families were selected and are being intercrossed to generate C3 population.

*Towards Objective 2*

The 150 parents of the C2 population were genotyped using 90K SNP array in 2021. Genomic selection models are being developed and validated using the genotyping data along with phenotypic data collected from the C1 and C2 populations.

*Towards Objective 3*

Top five half-sib families from our hard red spring wheat recurrent selection C1 population with great FHB resistance was selected and crossed to durum wheat cultivar Riveland. Over 500 F<sub>2</sub> or BC1F1 progenies from the hexaploid/tetraploid (6x/4x) crosses were planted and then the fertile ones were self-pollinated. Their F<sub>3</sub> or BC1F2 progenies are being evaluated for FHB severity in greenhouse.

**b) What were the significant results?**

Using historical FHB severity data collected from NDSU durum wheat breeding program, an initial GS model was developed with a good prediction accuracy of 0.55 for FHB severity.

**c) List key outcomes or other achievements.**

Some durum wheat S1 families from our recurrent selection population showed better FHB resistance than check cultivar Riveland.

FY20 Annual Performance Progress Report

PI: Li, Xuehui

USDA-ARS Agreement #: 59-0206-0-161

Reporting Period: 6/1/20 - 5/31/21

- 3. Was this research impacted by the COVID-19 pandemic (i.e. university shutdowns and/or restrictions, reduced or lack of support personnel, etc.)? If yes, please explain how this research was impacted or is continuing to be impacted.**

None.

- 4. What opportunities for training and professional development has the project provided?**

All members of my group including graduate students and hourly students have been involved in inoculation and disease scoring in greenhouse and field nurseries. This provided them a training opportunity for phenotypic evaluation of FHB resistance.

- 5. How have the results been disseminated to communities of interest?**

The results of FHB resistance of our recurrent selection population and other germplasm were shared with wheat breeders and research scientists through personal communication and the annual FHB Forum.

### **Training of Next Generation Scientists**

**Instructions:** Please answer the following questions as it pertains to the FY20 award period (6/1/20 - 5/31/21). The term “support” below includes any level of benefit to the student, ranging from full stipend plus tuition to the situation where the student’s stipend was paid from other funds, but who learned how to rate scab in a misted nursery paid for by the USWBSI, and anything in between.

- 1. Did any graduate students in your research program supported by funding from your USWBSI grant earn their MS degree during the FY19 award period?**

No

**If yes, how many?** [Click to enter number here.](#)

- 2. Did any graduate students in your research program supported by funding from your USWBSI grant earn their Ph.D. degree during the FY19 award period?**

No

**If yes, how many?** [Click to enter number here.](#)

- 3. Have any post docs who worked for you during the FY19 award period and were supported by funding from your USWBSI grant taken faculty positions with universities?**

No

**If yes, how many?** [Click to enter number here.](#)

- 4. Have any post docs who worked for you during the FY19 award period and were supported by funding from your USWBSI grant gone on to take positions with private ag-related companies or federal agencies?**

No

**If yes, how many?** [Click to enter number here.](#)

### Release of Germplasm/Cultivars

**Instructions:** In the table below, list all germplasm and/or cultivars released with full or partial support through the USWBSI during the FY20 award period (6/1/20 - 5/31/21). All columns must be completed for each listed germplasm/cultivar. Use the key below the table for Grain Class abbreviations.

*NOTE: Leave blank if you have nothing to report or if your grant did NOT include any VDHR-related projects.*

Name of Germplasm/Cultivar	Grain Class	FHB Resistance	FHB Rating (0-9)	Year Released
Nothing to report.	Select Grain Class	Select what represents your most resistant check	Enter as text 0-9 rating	Select Year

## Publications, Conference Papers, and Presentations

**Instructions:** Refer to the PR\_Instructions for detailed more instructions for listing publications/presentations about your work that resulted from all of the projects included in the FY20 grant award. Only citations for publications published (submitted or accepted) or presentations presented during the **award period (6/1/20 - 5/31/21)** should be included. If you did not publish/submit or present anything, state 'Nothing to Report' directly above the Journal publications section.

**NOTE:** Directly below each citation, you **must** indicate the Status (i.e. published, submitted, etc.) and whether acknowledgement of Federal support was indicated in the publication/presentation. See example below for a poster presentation with an abstract:

Winn, Z.J., Acharya, R., Lyerly, J., Brown-Guedira, G., Cowger, C., Griffey, C., Fitzgerald, J., Mason R.E., and Murphy, J.P. (2020, Dec 7-11). Mapping of Fusarium Head Blight Resistance in NC13-20076 Soft Red Winter Wheat (p. 12). In: Canty, S., Hoffstetter, A. and Dill-Macky, R.
