

USDA-ARS
U.S. Wheat and Barley Scab Initiative
FY20 Annual Performance Progress Report
Due date: August 31, 2021

Cover Page

Principle Investigator (PI):	David Schmale
Institution:	Virginia Tech.
E-mail:	dschmale@vt.edu
Phone:	540-231-6943
Fiscal Year:	2020
USDA-ARS Agreement ID:	59-0206-0-190
USDA-ARS Agreement Title:	Diagnostic Testing Services for Deoxynivalenol in the Eastern U.S.
FY20 USDA-ARS Award Amount:	\$ 158,964
Recipient Organization:	Virginia Polytechnic Institute and State University 1880 Pratt Drive, Suite 2006 Blacksburg, VA 24060
DUNS Number:	003137015
EIN:	54-6001805
Recipient Identifying Number or Account Number:	423536
Project/Grant Reporting Period:	6/7/20 - 6/6/21
Reporting Period End Date:	6/6/2021

USWBSI Individual Project(s)

USWBSI Research Category*	Project Title	ARS Award Amount
FST-S	Diagnostic Testing Services for Deoxynivalenol in the Eastern U.S.	\$ 158,964
FY20 Total ARS Award Amount		\$ 158,964

August 23, 2021

Principal Investigator

Date

* MGMT – FHB Management
FST – Food Safety & Toxicology
R- Research
S – Service (DON Testing Labs)
GDER – Gene Discovery & Engineering Resistance
PBG – Pathogen Biology & Genetics
EC-HQ – Executive Committee-Headquarters
BAR-CP – Barley Coordinated Project
DUR-CP – Durum Coordinated Project
HWW-CP – Hard Winter Wheat Coordinated Project
VDHR – Variety Development & Uniform Nurseries – Sub categories are below:
SPR – Spring Wheat Region
NWW – Northern Soft Winter Wheat Region
SWW – Southern Soft Red Winter Wheat Region

Project 1: *Diagnostic Testing Services for Deoxynivalenol in the Eastern U.S.*

1. What are the major goals and objectives of the research project?

The overall goals of our project were to (1) provide diagnostic testing services for DON for wheat and barley samples associated with USWBSI-supported research projects in the eastern U.S. and (2) reduce DON contamination in wheat and barley.

2. What was accomplished under these goals or objectives? *(For each major goal/objective, address these three items below.)*

a) What were the major activities?

In FY20, DON data was delivered for 5,008 wheat and barley samples from the following USWBSI investigators: Bowen (20 samples), Boyles (353 samples), Cowger (206 samples), Darby (116 samples), Glover (1,392 samples), Griffey/Santantonio (1,540 samples), Koehler (169 samples), Marshall (230 samples), Mehl/Langston (218 samples), Murphy (422 samples), Wegulo (112 samples), and Vaillancourt (20 samples). The testing number does NOT include controls, checks, and re-runs. Most of the samples tested in FY20 were 100g kernel lots from FHB field trials, but some were smaller lots (~5g samples) from laboratory experiments. We also processed samples associated with DON during detoxification studies. Extraction, clean-up, and quantification of DON were conducted following standard protocols using a GC/MS. Research associate Niki McMaster, graduate student Erica Pack, and PI David Schmale attended the 2020 virtual USWBSI meeting.

b) What were the significant results?

The proposed project provided essential DON testing services for the USWBSI, and supported the only USWBSI-associated DON testing lab in the eastern U.S. Many of the wheat and barley lines had not been tested previously for mycotoxins.

c) List key outcomes or other achievements.

The research has contributed to the development and release of new FHB-resistant wheat and barley varieties and has ensured rigorous testing of both new and historical wheat and barley varieties for mycotoxin contamination. The Schmale Lab at Virginia Tech continues to be committed to the long-term management of a successful and productive mycotoxin testing lab for the USWBSI. DON testing services were coordinated, supported, and managed by research associate Niki McMaster.

3. Was this research impacted by the COVID-19 pandemic (i.e. university shutdowns and/or restrictions, reduced or lack of support personnel, etc.)? If yes, please explain how this research was impacted or is continuing to be impacted.

Yes. In response to the COVID19 pandemic, Virginia Governor Northam issued a series of executive orders that ultimately led to the temporary shutdown of our physical Virginia Tech DON testing lab spaces on March 27, 2020. These physical lab spaces remained closed until June 8, 2020, when they were opened again under modified operations following strict safety guidelines and procedures. During the closure of the physical lab spaces, Niki McMaster worked remotely to improve curating, analyzing, and reporting DON data to our stakeholders, and attend a series of virtual training sessions outlined in the professional development section below

4. What opportunities for training and professional development has the project provided?

Research associate Niki McMaster continued to improve her analytical skills in mycotoxin detection and quantification.

5. How have the results been disseminated to communities of interest?

Schmale gave a series of lectures on mycotoxins for about 150 undergraduate students at Virginia Tech. McMaster communicated with USWBSI stakeholders via phone and email to coordinate sample collection, processing, and testing. Results were disseminated to stakeholders at the 2020 virtual USWBSI meeting.

Training of Next Generation Scientists

Instructions: Please answer the following questions as it pertains to the FY20 award period (6/7/20 - 6/6/21). The term “support” below includes any level of benefit to the student, ranging from full stipend plus tuition to the situation where the student’s stipend was paid from other funds, but who learned how to rate scab in a misted nursery paid for by the USWBSI, and anything in between.

- 1. Did any graduate students in your research program supported by funding from your USWBSI grant earn their MS degree during the FY19 award period?**

Yes No Not Applicable

If yes, how many? [Click to enter number here.](#)

- 2. Did any graduate students in your research program supported by funding from your USWBSI grant earn their Ph.D. degree during the FY19 award period?**

Yes No Not Applicable

If yes, how many? [Click to enter number here.](#)

- 3. Have any post docs who worked for you during the FY19 award period and were supported by funding from your USWBSI grant taken faculty positions with universities?**

Yes No Not Applicable

If yes, how many? [Click to enter number here.](#)

- 4. Have any post docs who worked for you during the FY19 award period and were supported by funding from your USWBSI grant gone on to take positions with private ag-related companies or federal agencies?**

Yes No Not Applicable

If yes, how many? [Click to enter number here.](#)

FY20 Annual Performance Progress Report

PI: Schmale, David

USDA-ARS Agreement #: 59-0206-0-190

Reporting Period: 6/7/20 - 6/6/21

Publications, Conference Papers, and Presentations

Instructions: Refer to the PR_Instructions for detailed more instructions for listing publications/presentations about your work that resulted from all of the projects included in the FY20 grant award. Only citations for publications published (submitted or accepted) or presentations presented during the **award period (6/7/20 - 6/6/21)** should be included. If you did not publish/submit or present anything, state 'Nothing to Report' directly above the Journal publications section.

NOTE: Directly below each citation, you **must** indicate the Status (i.e. published, submitted, etc.) and whether acknowledgement of Federal support was indicated in the publication/presentation. See example below for a poster presentation with an abstract:

Z.J. Winn, R. Acharya, J. Lyerly, G. Brown-Guedira, C. Cowger, C. Griffey, J. Fitzgerald, R.E. Mason and J.P. Murphy. 2020. "Mapping of Fusarium Head Blight Resistance in NC13-20076 Soft Red Winter Wheat." In: S. Canty, A. Hoffstetter, and R. Dill-Macky (Eds.), *Proceedings of the 2020 National Fusarium Head Blight Forum* (p. 12.), Virtual; December 7-11. Online: https://scabusa.org/pdfs/NFHBF20_Proceedings.pdf.
Status: Abstract Published and Poster Presented
Acknowledgement of Federal Support: YES (Abstract and Poster)

Journal publications.

Nothing to report.

Books or other non-periodical, one-time publications.

Nothing to report.

Other publications, conference papers and presentations.

Nothing to report.

FY20 PR – USWBSI ADDENDUM
DON Service Labs – Quality Control (QC) Data

Note: What is being requested is the lab’s quality control (i.e. check) data.

Insert below Lab’s Quality Control Data/Results from the FY20 Award Period (6/7/20 - 6/6/21):

Quality control data were collected at Virginia Tech through (a) the blind testing of samples with unknown DON levels (coordinated by the USWBSI through Trilogy Analytical Laboratories), and (b) the testing of subsamples of grain lots in each GC/MS run (to test for consistency among GC/MS runs). Known standards are run throughout the the GC/MS run to establish our standard curves.

a. QC data for blind testing of samples from Trilogy Labs (coordinated by Trilogy Labs, and communicated through Amber Hoffstetter; amber.hoffstetter@scabusa.org). Lab ID ‘Lab3’ is the Virginia Tech lab (highlighted in grey). 3-1 and 3-2 represent two different GC-MS machines. Lab IDs 1-4 are other USWBSI labs. Data are in ppm.

b. QC data from internal checks of subsamples of grain lots from Trilogy (19-Aug-1) in each GC/MS run (to test for consistency among GC/MS runs). Trilogy sample 19-Aug-1 was measured 288 times, and determined to have an average DON concentration of 3.85 ppm with a standard error of the mean of 0.026.
